

The Mission of Agent ****

EPISODE 3

Agent Fifi arrives at London Zoo. She picks up a map on her way in. Lots of the cages are empty with animals being moved out of the city. The aquariums are dry and the reptiles destroyed. It wasn't hard to find the long necks of the giraffes. She sat on a bench watching them feed from the high trees stripped bare.

It was 12 noon on the dot. There was no one around. She revisits the map. A clue to what she should look for must be here somewhere.

What does Fifi need to find and **where** is it?
